PROFESSIONAL SUMMARY

Motivated Software Engineering undergraduate (5th Semester) with hands-on experience building full-stack web applications and Python-based tools. Proficient in C++, Python, React, and SQL, with practical freelance experience delivering client projects end-to-end. Strong problem-solving ability, attention to detail, and a fast learning curve. Seeking an entry-level internship to apply technical skills to real-world projects within a collaborative software house environment.

EDUCATION

Bachelor of Software Engineering 2024 – Present

Federal Urdu University of Arts, Science & Technology, Islamabad — Currently in 5th Semester

TECHNICAL SKILLS

- Programming Languages: C++, Python, Java (OOP), SQL (MySQL)
- Web Development: React, HTML, CSS, JavaScript, TypeScript, Tailwind CSS, Vite, Node.js
- Tools & Platforms: Figma, VS Code, Git, ESLint, MS Office (Word, Excel, PowerPoint), Outlook
- Core Strengths: Communication & Interpersonal Skills, Problem-Solving, Attention to Detail, Analytical Thinking

PROJECTS

Hospital Website System

Oct – Dec 2025

Freelance Project — React (TypeScript), Tailwind CSS, Vite, Node.js

- Built a fully responsive hospital website featuring department overviews, specialist doctor profiles, and service listings.
- Implemented clean navigation and contact/appointment call-to-actions to improve patient user experience.
- Applied component-based architecture and ESLint-driven code quality assurance across the codebase.
- Delivered a scalable frontend foundation optimized for desktop, tablet, and mobile devices.

Offline PDF Redaction Tool

August 2025

Federal Urdu University of Arts, Science & Technology — Python, PyMuPDF (fitz)

- Developed a secure, offline PDF redaction tool that permanently removes sensitive information from documents.
- Implemented text search, bounding-box detection, and permanent black-box redaction annotations for irreversible masking.
- Designed for privacy-sensitive use cases such as CNIC/ID protection, legal contracts, and academic records.
- Github: github.com/Abdullah0106/Offline-pdf-redaction-tool

Netflix Clone

December 2025

Federal Urdu University of Arts, Science & Technology — HTML, CSS

- Recreated the Netflix landing page UI to strengthen frontend structuring and layout design skills.
- Practiced responsive design principles and real-world UI implementation techniques.

CERTIFICATIONS

- Google: Make the Sale — Build, Launch, and Manage E-commerce Stores (Coursera)
- Generative AI: Prompt Engineering Basics (Coursera)
- Generative AI: Introduction and Applications (Coursera)

ADDITIONAL INFORMATION

- **Languages:** Fluent in English and Urdu
- **Interests:** Computer Programming, Mobile Games, Designing, Hiking & Cricket
