Summary

A motivated and detail-oriented undergraduate student currently pursuing a Bachelor's degree in Software Engineering (4th Semester), seeking an entry-level opportunity in a software house to gain practical industry experience. Possess a solid foundation in C++, Python, Web Development, React, and SQL, with strong problem-solving and analytical abilities. Skilled in working collaboratively within a team and communicating ideas effectively. Eager to apply technical knowledge to real-world projects in a fast-paced environment while continuously enhancing professional and technical skills.

Projects

* Offline-pdf-redaction-tool

Associated with Federal Urdu University of Arts, Science & Technology, Islamabad.

August - 2025

Github repo : <https://github.com/Abdullah0106/Offline-pdf-redaction-tool>

 Built a Secure PDF Redaction Tool using Python

I completed a PDF Redaction Tool that permanently removes sensitive information from PDF files — similar to platforms like iLovePDF.

Technologies Used

◆ Backend / Core Logic

Python

PyMuPDF (fitz) — for real, irreversible PDF redaction

Virtual Environment (venv) — dependency isolation

◆ Development Tools

VS Code

pip & requirements.txt

Windows PowerShell

◆ PDF Processing

Text search and extraction

Bounding box detection

Permanent redaction annotations

Secure PDF rewriting

Key Features

✓ Permanent PDF redaction (not reversible)

✓ Text-based automatic redaction

✓ Black box masking compliant with security standards

✓ Clean output PDF generation

✓ iLovePDF-style backend behavior

✓ Privacy-focused document processing

Use Cases

Legal documents

CNIC / ID protection

Contracts & agreements

Academic records

Confidential business files

* Netflix Clone using HTML & CSS

October - 2025

Associated with Federal Urdu University of Arts, Science & Technology, Islamabad.

 **GitHub Repo:** [GitHub Repo: Netflix Clone using HTML & CSS](#) 

As part of my learning journey in Web Development, I built a Netflix Clone using HTML & CSS 

This project helped me improve my understanding of real-world UI design and frontend structure.

* Hospital Website System

December - 2025

Associated with Freelance

Link : [Hospital Website](#)

Key Features:

- Department Overviews – Easy access to available medical departments
- Specialist Doctor Profiles – Expertise, experience, and appointment guidance
- Services & Facilities – Display of hospital offerings and patient care facilities
- Responsive UI – Fully optimized across desktop, tablet, and mobile
- Clean Navigation – Smooth flow between pages for better UX
- Contact & Appointment CTAs – Quick access to reach out or book appointments

Tech Stack & Development:

- React (TypeScript TSX)
- Tailwind CSS + PostCSS
- Vite
- Node.js & npm
- ESLint
- Git

Skills Gained:

- UI/UX design principles for healthcare platforms
- Component-based architecture using React
- Code quality assurance through ESLint
- Styling optimization with utility-first CSS
- Project structuring and version control handling

Project Objectives:

- Deliver a clean and professional healthcare web experience
- Improve the discoverability of departments and doctors
- Optimize performance using a modern frontend toolchain
- Build a scalable foundation for future healthcare modules

Education

2024 - *Present*

Bachelor's in Software Engineering

Federal Urdu University of Arts, Science & Technology
Semester: 4th

Skills & Expertise

- Communication & Interpersonal Skills
- Problem-Solving
- Attention to Detail & Accuracy
- Technical & Analytical Skills

Hobbies & Interest

- Computer Programming
- Mobile Games
- Designing
- Hiking & Cricket
-

Additional Skills

- Proficient in MS Office (Word, Excel, PowerPoint) Outlook.
- Fluent in English, Urdu.

Technologies

Figma | HTML | Python | CSS | C++ | JAVA with OOP | MySQL | React
